

## Inspector Deluxe Radiation Monitor

The Inspector is a microprocessor controlled radiation measuring instrument which offers excellent sensitivity to low level (0.001 to 50 mR/hr) activity. The digital readout is displayed with a red count light and audible beep, providing instant indication of the radiation level. The Inspector includes an adjustable timer and external calibration controls.

The Inspector is a must for all Nuclear Medicine Departments because of its ease-of-use and accuracy. Small size does not limit the power of its performance. Dual miniature jack drives CMOS or TTL devices with count to computer or data logger.

### Features

- 4 Digit liquid crystal display
- Set counting periods from 1 min to 24 hours
- For counting alpha, beta, gamma or x-rays
