

Portable Blue/Green Sensitometer

GAMMEX MA5034

Sensitometry is the single most effective way to test the processor operation and consistency. For day to day processor quality control, the Gammex MA5034 Sensitometer provides a versatile, reliable, and highly accurate test. With its 21 step light modulator, a full range of densities can be tested with a single piece of film. The Gammex MA5034 is useful for all types of film, from sensitive x-ray film to roll or cine film. It can test either blue sensitive or green sensitive film. To expose the film simply close the cover and listen for the tone.
